1. EXECUTIVE SUMMARY

1.1 Objective

In accordance with the 2017/18 Internal Audit Annual Plan, the key objectives of this audit were to assess the design effectiveness of controls and processes within payroll to assess compliance with Payroll policies, procedures, best practices, and regulatory requirements.

1.2 Scope

The scope of this audit was key Payroll processes for the period from 1 January to 31 July 2017, and included:

- Existing payroll policies, procedures and practices within the city (design effectiveness)
- Compliance with policies, procedures and processes through limited sample testing (operating effectiveness). Specifically, policies, procedures and processes were:
 - Records of Delegation of Authority and Authorisation 2016-2017
 - AP- Delegation payment approval dated 12 February 2016
 - Administrative Protocol Manual 2 August 2017
 - Council Policy Manual - As at 27 June 2017
 - Procedure Manual 18 May 2017
 - Checklist - New Starter Induction
 - Payroll procedure

1.3 Approach

Our approach included:

- Met with the City to agree the Terms of Reference
- Obtained and reviewed copies of all relevant, authorised policies and procedures
- Conducting interviews and walkthroughs with the Manager HR, Manager of Finance and Payroll Officer and documented key processes and controls
- Evaluated the design effectiveness and adequacy of key controls identified
- Performed sample testing where appropriate
- Prepared weekly status report to provide audit status updates
- Prepared and issued our draft for management comments
- Reviewing management comments and issuing final report.

1.4 Conclusion

We identified improvements that can be made by implementing governance processes in various areas of the payroll function, specifically in relation to documenting policy and procedures, segregation of duties and payroll system access controls. Results from our last audit were reported on 29 January 2016 and during this audit we have identified three recurring findings where we have not been able to evidence closure of previous recommendations.

Including the recurring findings, we identified two high risk, one medium risk and two low risk findings. Please refer to the section 1.4 for a Summary of Findings and section 2 for Detailed Findings and Recommendations in this report for more details.

4. RISK RATINGS

LEVEL OF ASSURANCE	DESIGN of internal control framework	
	Findings from review	Design Opinion
Substantial 	Appropriate procedures and controls in place to mitigate the key risks.	There is a sound system of internal control designed to achieve system objectives.
Moderate 	In the main there are appropriate procedures and controls in place to mitigate the key risks reviewed albeit with some that are not fully effective.	Generally a sound system of internal control designed to achieve system objectives with some exceptions.
Limited 	A number of significant gaps identified in the procedures and controls in key areas. Where practical, efforts should be made to address in-year.	System of internal controls is weakened with system objectives at risk of not being achieved.
None 	For all risk areas there are significant gaps in the procedures and controls. Failure to address in-year affects the quality of the organisation's overall internal control framework.	No system of internal control.

Risk Significance

High 	A weakness where there is substantial risk of loss, fraud, impropriety, poor value for money, or failure to achieve organisational objectives. Such risk could lead to an adverse impact on the business. Remedial action must be taken urgently.
Medium 	A weakness in control which, although not fundamental, relates to shortcomings which expose individual business systems to a less immediate level of threatening risk or poor value for money. Such a risk could impact on operational objectives and should be of concern to senior management and requires prompt specific action.
Low 	Areas that individually have no significant impact, but where management would benefit from improved controls and/or have the opportunity to achieve greater effectiveness and/or efficiency.

5. INHERENT LIMITATIONS

Because of the inherent limitations of any internal control structure, it is possible that fraud, error or non-compliance with laws and regulations may occur and not be detected. Further, the internal control structure within which the control procedures that are subject to internal audit operate is not reviewed in its entirety and, therefore, no opinion or view is expressed as to the effectiveness of the greater internal control structure. An internal audit is not designed to detect all weaknesses in control procedures as it is not performed continuously throughout the period and the tests performed on the control procedures are done on a sample basis. Any projection of the evaluation of control procedures to future periods is subject to the risk that the procedures may become inadequate because of changes in conditions, or that the degree of compliance with them may deteriorate.

We believe that the statements made in this internal audit report are accurate, but no warranty of completeness, accuracy or reliability is given in relation to the statements and representations made by, and the information and documentation provided by, client management and personnel. We have indicated within this internal audit report the sources of the information provided. We have not sought to verify those sources independently unless otherwise noted within the internal audit report. We are under no obligation in any circumstance to update this internal audit report, in either oral or written form, for events occurring after the internal audit report has been issued in final form unless specifically agreed with management.

5. RESTRICTION OF USE

This report is intended solely for the use of management, the City of Nedlands Council, the external auditors, regulatory agencies or the City's legal counsel and cannot be used by, circulated, quoted, disclosed, or distributed to third parties without BDO's prior written consent.
