Balancing the Ship: Forward-Thinking Vision

I am hard working and dedicated. I am standing for Council because our community deserves a local government that masters its core functions while being sustainable. My mission is to "balance the ship" delivering the high-standards of services while securing our city's future liveability.

True leadership is about more than just maintaining the status quo; it is about ensuring that while our roads are smooth and our bins are collected, we are also planting the seeds for a sustainable, resilient neighbourhood.

My Commitment to You:

Fiscal Integrity & Transparency: I will champion a clean audit process to ensure every ratepayer dollar is spent effectively. Your rates are an investment in our community, and I will be the watchdog for transparent, waste-free spending.

Cooling Our Suburbs Our streets shouldn't be "heat sinks." I am committed to increasing our urban forest canopy, transforming hot bitumen into cool, shaded green corridors that improve our health and property values.

Preserving Local Character: Urban infill must be managed with care. I will work closely with residents, State authorities and stakeholders to ensure new developments respect our heritage and do not compromise the unique "feel" of our streets.

Empowering Local Environmentalism: Support to our vital bushland groups and incentivise grassroots environmental projects. Our natural heritage is an asset, and it deserves proactive protection.

Practical Community Upgrades: I propose a mandatory roll-out of shade cloth over all playground swings to protect our children from the sun. Furthermore, I will offer cooperative, support to our local sporting groups to ensure they bloom

Your Voice, My Priority

Leadership starts with listening. I am dedicated to being an accessible representative who acts on your concerns. Together, we can deliver a city that is not only functional and efficient but also beautiful and sustainable for the generations to come
