

### **Additional Information**

The Hollywood ward has within, and surrounding, it important assets and pressures. These include QEII, Shenton College, the railway line, Stirling Highway, Karrakatta Cemetery, Underwood bushland, UWA and the future sale of Irwin Barracks. They bring unique opportunities and important responsibilities, requiring careful planning and coordination with other levels of government.

My priorities for our city are focused on place and people, with particular attention to growing the amenity and liveability that residents value. I am concerned about increasing urban heat, declining tree canopy and the cumulative impacts of ill-conceived development on neighbourhood character. I support sensible planning policies that contribute to our enviable 'leafy suburb' reputation.

Cities must also evolve and grow. I support development that is well-designed, improves amenity and is respectful of neighbours. Council must be prepared to resist proposals that undermine liveability, place excessive strain on existing infrastructure or prioritise short term outcomes. Decisions should be informed by high-quality research, objective evidence and the wisdom of lived experience, especially where long-term consequences are involved.

Council has a responsibility to manage ratepayer funds carefully and transparently, ensuring expenditure delivers clear value to the community. I support open decision making, respectful debate and genuine community consultation.

If elected, I will approach the role of councillor with integrity, independence and an open mind. I will be available to residents, willing to listen and prepared to change my view when presented with better evidence. I will work constructively with fellow councillors and council staff to help rebuild trust and ensure stable, effective local government that best serves the public interest.
