

Additional Information

I'm nominating for Council in Hollywood Ward because I want Nedlands to be well run: safe public assets, reliable local services, and decisions made professionally, transparently and with follow-through.

For many residents, good local government is simple and practical - maintained footpaths and local streets, safe parks and public spaces, responsive day-to-day services, and planning decisions that are consistent and fair. People should be able to understand what the rules are, have confidence theyll be applied predictably, and feel that neighbourhood character and amenity are being respected as our community changes.

I'm a local resident, parent of two, and I work in technology consulting focused on delivery, governance and accountability. I'm used to turning messy situations into clear priorities, measurable plans and regular reporting and then doing the work.

If elected, my focus will be:

1. Safety and core services - fix what's unsafe, reduce the maintenance backlog, and get the basics working reliably.
2. Planning and amenity - balanced, predictable decisions on infill and development, with practical attention to impacts like bulk/scale, privacy, parking and streetscape.
3. Governance and value for rates - strong controls, openness, audit progress, and spending that delivers visible outcomes.

In the first months, two priorities matter most: appointing the right CEO and delivering a credible budget with clear priorities and measurable progress. I'll be accessible, explain my votes in plain English, and work constructively with councillors, staff and the community to deliver results.
