I'm nominating for Council in Hollywood Ward because I want Nedlands to be well run: safe public assets, reliable local services, and decisions made professionally and transparently. For most residents this means the basics done well - footpaths, parks and local streets maintained, responsive services, and predictable planning decisions.

I'm a local resident, parent of two, and I work in technology consulting focused on delivery, governance and accountability. I'll bring clear priorities, honest reporting and follow-through.

My focus is:

- (1) Safety and core services fix what's unsafe and get the basics working.
- (2) Planning and amenity balanced decisions on infill and development.
- (3) Value for rates strong controls and spending that delivers results.

Early priorities: appoint the right CEO and deliver a credible budget with measurable progress. I'll be accountable for my votes and work constructively to deliver results.
