

Additional Information

I stand for governing well & have lived in Nedlands for 60 years with my family. I know the City inside out. I support preserving and enhancing our natural environment. The friends & community groups who volunteer their time should be supported. Remnant bushland should be protected & our annual city water quota used sustainably. We have beautiful parks and sporting facilities which require upkeep. People enjoy coming into Nedlands so the City needs to ensure they maintain facilities. We have a foreshore that needs protecting & a beach with facilities that require upkeep.

The community expects LG to do all they can in their decision making to support their treasured amenity. This includes providing information that is understandable & accessible & has the end users front and centre of decision making. Ensuring deidentified full submissions are available in Council agendas & not just summarized tables to enhance decision making. Making sure people are notified as required about proposed & upcoming building and development.

Strong and energetic I have experience & integrity. I was elected until 2027. I didn't resign. I am committed to full attendance & to ensuring public access to records is available. Involve the community in our annual budget deliberations. Ensure submitted questions are answered in full at Council meetings and that residents can address Council.

Working towards a connected safe community with leafy green streets. A Planning Assessment member I am dedicated to ensuring all of Nedlands continues to thrive & is welcoming forward-thinking city for future generations.

I am a member of the LG Elected Members Association & have a Diploma in Local Government and co-founder of Western Inclusion Neurodivergent Alliance. Member of Committee that founded Tresillian. I stand for empowering you engaging your participation & giving you what you want & need to question effectively and hold Council and the Administration to account. I need your support.
